

AMENDMENTS TO THE CLAIMS:

Please amend Claims 48 and 50 and add new Claims 51 and 52 as follows:

1 - 47. (Cancelled)

48. (Currently Amended) A receiving apparatus connectable to an internet, said apparatus comprising:

a receiving unit for receiving a ~~streaming content~~ moving image-streaming content by an access through the internet to a URL of the streaming content;

a memory unit for storing URL information linked to the moving image-streaming content received by the receiving unit;

a decoder for decode processing the streaming content so as to be displayed on a display screen;

a power source for supplying a power at least to the decoder;

an operation unit for receiving an operation of turning off and turning on the power source;

a storage for storing the ~~streaming content~~ moving image-streaming content received by the receiving unit; and

a control unit for (1) controlling, responsive to the receiving by the operation unit of the operation of turning off the power source, to stop the displaying of the ~~streaming content~~ moving image-streaming content on the display screen, to read out the URL information stored in the memory unit, and to periodically repeat accessing of a ~~access the~~ URL linked to the ~~streaming content~~ moving image-streaming content, of which displaying is stopped, so as to receive the

~~streaming content~~ moving image-streaming content by the receiving unit and to store the ~~streaming content~~ moving image-streaming content in the storage, and (2) controlling, responsive to the receiving by the operation unit of the operation of turning on the power source, to read out the ~~streaming content~~ moving image-streaming content from the storage and to start the displaying of the ~~streaming content~~ moving image-streaming content on the display screen.

49. (Cancelled)

50. (Currently Amended) A receiving apparatus comprising:

a first receiving unit for receiving a ~~streaming content~~ moving image-streaming content by an access through an internet to a URL of the ~~streaming content~~ moving image-streaming content;

a memory unit for storing URL information linked to the moving image-streaming content received by the first receiving unit;

a second receiving unit for receiving a television broadcast program transmitted through a broadcast signal;

an operation unit for receiving an operation of switching from a displaying of the ~~streaming content~~ moving image-streaming content on a display screen to a displaying of the television broadcast program on the display screen, and an operation of switching from the displaying of the television broadcast program on the display screen to the displaying of the ~~streaming content~~ moving image-streaming content on the display screen;

a storage for storing the ~~streaming content~~ moving image-streaming content received by the first receiving unit; and

a control unit for (1) controlling, responsive to the receiving by the operation unit of the operation of switching from the displaying of the ~~streaming content~~ moving image-streaming content on the display screen to the displaying of the television broadcast program on the display screen, to stop the displaying of the ~~streaming content~~ moving image-streaming content on the display screen, to read out the URL information stored in the memory unit, and to ~~access the~~ periodically repeat accessing of a URL linked to the ~~streaming content~~ moving image-streaming content, of which displaying is stopped, so as to receive the ~~streaming content~~ moving image-streaming content by the receiving unit and to store the ~~streaming content~~ moving image-streaming content in the storage, and (2) controlling, responsive to the receiving by the operation unit of the operation of switching from the displaying of the television broadcast program on the display screen to the displaying of the ~~streaming content~~ moving image-streaming content on the display screen, to read out the ~~streaming content~~ moving image-streaming content from the storage and to start the displaying of the ~~streaming content~~ moving image-streaming content on the display screen.

51. (New) The receiving apparatus according to claim 48, wherein the control unit is further configured to, responsive to the receiving by the operation unit of the operation of tuning on the power source, read out the URL information stored in the memory unit and to receive the latest moving image-streaming content by the receiving unit by accessing the URL linked to the moving image-streaming content.

52. (New) The receiving apparatus according to claim 50, wherein the control unit is further configured to, responsive to the receiving by the operation unit of the operation of switching from the displaying of the television broadcast program on the display screen to the displaying of the moving image-streaming content on the display screen, read out the URL information stored in the memory unit and to receive the latest moving image-streaming content by the receiving unit by accessing the URL linked to the moving image-streaming content.
